

Saurabh Ashok Parthe

Pune, India | +91 9834367685 | saurabh.parthe.1@gmail.com | [LinkedIn](#) | [LeetCode](#) | [GitHub](#) | [HackerRank](#)

Software Engineer with **2 years** of experience in building **scalable, reliable, and maintainable systems** using modern architectures. Skilled in applying **clean code, design patterns** to deliver robust enterprise solutions. Strong focus on **system design, performance enhancement**, and collaborative development in fast-paced environments.

WORK EXPERIENCE

Skylarklabs - Software Engineer (SDE-1)

Nov 2025 - Present

- **Architected a distributed microservices backend in Golang** to concurrently process real-time video metadata and threat event streams from **1,000+ simultaneous camera feeds and edge AI sensors**, leveraging **goroutines, worker pool patterns, and channel-based pipelines** to maintain consistent **sub-50ms end-to-end latency** across Skylark's field-deployed surveillance infrastructure.
- **Owned end-to-end DevOps and infrastructure pipelines** using **Docker and Kubernetes (K8s)**, designing containerized deployments, horizontal pod autoscaling, and CI/CD workflows to ensure **99.9% uptime** for mission-critical AI surveillance systems operating across geo-distributed edge nodes in defense, border security, and public safety environments.

Financial Transaction Processing Platform

NeoXam - Software Engineer (Frontend - Backend)

May 2025 - Nov 2025

- Engineered a next-generation **Financial Transaction Processing Platform** that identifies most cost-efficient settlement routes and automatically generates claims based on optimized pricing. Leveraged **Integration Architecture** principles, incorporating REST APIs, Kafka-based event-driven communication, real-time data indexing with AWS ElasticSearch.
- Designed and implemented **cost-effective trade and payment processing** by integrating external pricing/market data APIs, enabling real-time comparisons and automated claim settlement. Ensured **high availability and fault tolerance** using Spring Boot, Spring Batch, Java 21, MySQL, AWS Secret Manager, and Kafka.
- **Handled critical production issues** by implementing proactive monitoring, distributed logging (AWS CloudWatch, ELK Stack), and automated failover mechanisms, ensuring **99.99% system uptime** and business continuity.

Internship

Seven Mentor And Training Pvt Ltd - Data Scientist

Aug 2023 - Aug 2024

- Built an **end-to-end ML pipeline** using **Scikit-learn and PyCaret** for feature selection.
- Developed a **student dropout prediction system** using **XGBoost and Random Forest classifiers** with hyperparameter tuning via GridSearchCV, achieving 89% accuracy on imbalanced datasets handled through SMOTE oversampling techniques.
- Developed a **hybrid course recommendation system** using **Matrix Factorization (SVD) and cosine similarity**, processing historical student engagement data to generate personalized learning recommendations, enhancing course discovery and retention.

TECHNICAL SKILLS

- **Programming Languages:** Java, Python, C++, Golang.
- **Frameworks & Libraries:** Spring Boot, Spring MVC, React.js, Node.js, Django, Flask, TensorFlow
- **Databases & Messaging:** MySQL, PostgreSQL, MongoDB, Kafka, RabbitMQ, Apache Spark.
- **Cloud & DevOps:** AWS, Azure, Kubernetes, Docker, Jenkins, Terraform, CICD Pipelines, Cloud Security, Shell Scripting.
- **Monitoring & Debugging:** Datadog, ELK Stack, Distributed Logging, XML, JSON.

EDUCATION

- **B.E (Electronics & Telecommunication Engineering)** - Pune University | CGPA : **7.92**
- **Post Graduate Diploma (Artificial Intelligence)** - Centre for Development of Advanced Computing (C-DAC)

CERTIFICATIONS & ACHIEVEMENTS

- Ranked **2nd among E&TC Engineering students** in the final year.
- Solved **600+ algorithmic problems on LeetCode**, consistently ranking among the **top global problem solvers**, showcasing strong problem-solving and data structures expertise.
- **Contributed to open-source projects**, collaborating with the global developer community and improving codebases adopted by multiple users worldwide.
